

Datasheet for ABIN2539252 **SDHB ELISA Kit**

Overview

Quantity:	96 tests
Target:	SDHB
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Mouse SDHB ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other
	hiological fluids. This assay has high sensitivity and excellent specificity for detection of

r urpose.	Mouse of the felo, that is a sundament felo, that for use with this de homogenates and other
	biological fluids. This assay has high sensitivity and excellent specificity for detection of
	Succinate Dehydrogenase Complex Subunit B (SDHB)
	No significant cross-reactivity or interference between Succinate Dehydrogenase Complex
	Subunit B (SDHB) and analogues was observed.
Sample Type:	Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Succinate
	Dehydrogenase Complex Subunit B (SDHB)
Sensitivity:	< 0.053 ng/mL

Target Details	
Target:	SDHB
Alternative Name:	Succinate Dehydrogenase Complex Subunit B (SDHB) (SDHB Products)
Application Details	
Application Notes:	 Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
