

Datasheet for ABIN2539349

T-Bet ELISA Kit

Overview

Quantity:	96 tests
Target:	T-Bet
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human T-Box Protein 21 ELISA Kit is a sandwich ELISA kit for use with Cell lysates and other
	biological fluids. This assay has high sensitivity and excellent specificity for detection of T-Box
	Protein 21 (TBX21)
	No significant cross-reactivity or interference between T-Box Protein 21 (TBX21) and analogues
	was observed.
Sample Type:	Cell Lysate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of T-Box Protein 21
	(TBX21)
Sensitivity:	< 0.052 ng/mL

Target Details

Target:	T-Bet
Alternative Name:	T-Box Protein 21 (TBX21) (T-Bet Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
