

## Datasheet for ABIN2539925

## **TKT ELISA Kit**

## Overview

Quantity:	96 tests
Target:	TKT
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat Transketolase ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue
Purpose:	Rat Transketolase ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent
Purpose:	•
Purpose:	homogenates and other biological fluids. This assay has high sensitivity and excellent
Purpose:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Transketolase (TKT)
Purpose:  Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Transketolase (TKT)  No significant cross-reactivity or interference between Transketolase (TKT) and analogues was
	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Transketolase (TKT)  No significant cross-reactivity or interference between Transketolase (TKT) and analogues was observed.
Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Transketolase (TKT)  No significant cross-reactivity or interference between Transketolase (TKT) and analogues was observed.  Plasma, Serum, Tissue Homogenate
Sample Type: Analytical Method:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Transketolase (TKT)  No significant cross-reactivity or interference between Transketolase (TKT) and analogues was observed.  Plasma, Serum, Tissue Homogenate  Quantitative

## Target Details

Target:	TKT
Abstract:	TKT Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
