

Datasheet for ABIN2539986

TPM3 ELISA Kit

Overview

Quantity:	96 tests
Target:	TPM3
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Tropomyosin 3 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and
Purpose:	Human Tropomyosin 3 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of

Purpose:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Tropomyosin 3 (TPM3)
Purpose: Sample Type:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Tropomyosin 3 (TPM3) No significant cross-reactivity or interference between Tropomyosin 3 (TPM3) and analogues
	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Tropomyosin 3 (TPM3) No significant cross-reactivity or interference between Tropomyosin 3 (TPM3) and analogues was observed.
Sample Type:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Tropomyosin 3 (TPM3) No significant cross-reactivity or interference between Tropomyosin 3 (TPM3) and analogues was observed. Tissue Homogenate
Sample Type: Analytical Method:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Tropomyosin 3 (TPM3) No significant cross-reactivity or interference between Tropomyosin 3 (TPM3) and analogues was observed. Tissue Homogenate Quantitative

Target Details

Target:	TPM3
Abstract:	TPM3 Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
