

## Datasheet for ABIN2540142 TWF1 ELISA Kit

Overview

Quantity:	96 tests
Target:	TWF1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Twinfilin 1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and
	other biological fluids. This assay has high sensitivity and excellent specificity for detection of
	Twinfilin 1 (TWF1)
	Twinfilin 1 (TWF1) No significant cross-reactivity or interference between Twinfilin 1 (TWF1) and analogues was
Sample Type:	No significant cross-reactivity or interference between Twinfilin 1 (TWF1) and analogues was
Sample Type: Analytical Method:	No significant cross-reactivity or interference between Twinfilin 1 (TWF1) and analogues was observed.
	No significant cross-reactivity or interference between Twinfilin 1 (TWF1) and analogues was observed. Tissue Homogenate
Analytical Method:	No significant cross-reactivity or interference between Twinfilin 1 (TWF1) and analogues was observed. Tissue Homogenate Quantitative

Target Details	
Target:	TWF1
Alternative Name:	Twinfilin 1 (TWF1) (TWF1 Products)
Pathways:	Regulation of Actin Filament Polymerization, Maintenance of Protein Location
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
