| | | | | |

| Quantity: | 96 tests |
|-----------------|-------------------------------|
| Target: | Adrenal Cortex Antibody (ACA) |
| Reactivity: | Human |
| Application: | ELISA |
| Product Details | |

| Purpose: | Human Adrenal Cortex Antibody ELISA Kit is an ELISA kit against Human Adrenal Cortex Antibody. |
|-------------------|---------------------------------------------------------------------------------------------------|
| Sample Type: | Cell Culture Supernatant, Plasma, Serum |
| Detection Method: | Colorimetric |
| Characteristics: | Human Adrenal Cortex Antibody ELISA Kit is an ELISA kit against Human Adrenal Cortex Antibody. |

Application Notes:

| l arget Details | |
|---------------------|-------------------------------|
| Target: | Adrenal Cortex Antibody (ACA) |
| Alternative Name: | Adrenal Cortex Antibody |
| Target Type: | Antibody |
| Application Details | |

Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less

than 5% within the expiration date under appropriate storage conditions. To minimize

Application Details

| The state of the s | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|--|
| | performance fluctuations, operation procedures and lab conditions should be strictly controlled. | |
| | It is also strongly suggested that the whole assay is performed by the same user throughout. | |
| | Recommended dilutions: Optimal dilutions/concentrations should be determined by the end | |
| | user. | |
| Comment: | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% | |
| | within the expiration date under appropriate storage conditions. To minimize performance | |
| | fluctuations, operation procedures and lab conditions should be strictly controlled. It is also | |
| | strongly suggested that the whole assay is performed by the same user throughout. | |
| Plate: | Pre-coated | |
| Restrictions: | For Research Use only | |
| | | |
| Handling | | |
| Storage: | 4 °C/-20 °C | |
| Storage Comment: | Upon receipt, store the kit according to the storage instruction in the kit's manual. | |
| Expiry Date: | 6 months | |
