

Datasheet for ABIN2541392

Annexin a10 ELISA Kit

Overview

Overview	
Quantity:	96 tests
Target:	Annexin a10 (ANXA10)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	15.62 pg/mL - 1000 pg/mL
Minimum Detection Limit:	15.62 pg/mL
Application:	ELISA
Product Details	
Purpose:	Human Annexin A10 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other
	Human Annexin A10 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of
	biological fluids. This assay has high sensitivity and excellent specificity for detection of
	biological fluids. This assay has high sensitivity and excellent specificity for detection of Annexin A10 (ANXA10)
	biological fluids. This assay has high sensitivity and excellent specificity for detection of Annexin A10 (ANXA10) No significant cross-reactivity or interference between Annexin A10 (ANXA10) and analogues
Purpose:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Annexin A10 (ANXA10) No significant cross-reactivity or interference between Annexin A10 (ANXA10) and analogues was observed.
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Annexin A10 (ANXA10) No significant cross-reactivity or interference between Annexin A10 (ANXA10) and analogues was observed. Plasma, Serum
Purpose: Sample Type: Analytical Method:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Annexin A10 (ANXA10) No significant cross-reactivity or interference between Annexin A10 (ANXA10) and analogues was observed. Plasma, Serum Quantitative

Target Details

Target:	Annexin a10 (ANXA10)
Abstract:	ANXA10 Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
