

Datasheet for ABIN2541595 Apelin 17 ELISA Kit

Overview

| Quantity: | 96 tests |
|---|---|
| Target: | Apelin 17 (AP17) |
| Reactivity: | Human |
| Method Type: | Competition ELISA |
| Detection Range: | 24.69 pg/mL - 2000 pg/mL |
| Minimum Detection Limit: | 24.69 pg/mL |
| Application: | ELISA |
| Product Details | |
| | |
| Purpose: | Human Apelin 17 ELISA Kit is a competitive ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Apelin 17 (AP17) No significant cross-reactivity or interference between Apelin 17 (AP17) and analogues was observed. |

| Target Details | |
|---------------------|--|
| Target: | Apelin 17 (AP17) |
| Abstract: | AP17 Products |
| Application Details | |
| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized |
| Comment: | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. |
| Plate: | Pre-coated |
| Restrictions: | For Research Use only |
| Handling | |
| Storage: | 4 °C/-20 °C |
| Storage Comment: | Upon receipt, store the kit according to the storage instruction in the kit's manual. |
| Expiry Date: | 6 months |
