

Datasheet for ABIN2542024

Beta Lactoglobulin (LGB) ELISA Kit

Overview

Sensitivity:

Quantity:	96 tests
Target:	Beta Lactoglobulin (LGB)
Reactivity:	Cow
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Cow Beta-Lactoglobulin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Beta-Lactoglobulin (bLg) No significant cross-reactivity or interference between Beta-Lactoglobulin (bLg) and analogues was observed.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Beta-Lactoglobulin
	(bLg)

< 0.067 ng/mL

Target Details

Application Details Application Notes: Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only Handling Storage: 4 °C/-20 °C Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual. Expliy Date: 6 months	Target:	Beta Lactoglobulin (LGB)
