

## Datasheet for ABIN2542072 Biglycan ELISA Kit

Overview

| Quantity:                          | 96 tests  |
|------------------------------------|---|
| Target:                            | Biglycan (BGN)  |
| Reactivity:                        | Human   |
| Method Type:                       | Sandwich ELISA  |
| Detection Range:                   | 0.312 ng/mL - 20 ng/mL  |
| Minimum Detection Limit:           | 0.312 ng/mL   |
| Application:                       | ELISA   |
| Product Details                    |   |
|                                    |   |
| Purpose:                           | Human Biglycan ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other<br>biological fluids. This assay has high sensitivity and excellent specificity for detection of<br>Biglycan (BGN)<br>No significant cross-reactivity or interference between Biglycan (BGN) and analogues was<br>observed. |
| Purpose:<br>Sample Type:           | biological fluids. This assay has high sensitivity and excellent specificity for detection of<br>Biglycan (BGN)<br>No significant cross-reactivity or interference between Biglycan (BGN) and analogues was   |
|                                    | biological fluids. This assay has high sensitivity and excellent specificity for detection of<br>Biglycan (BGN)<br>No significant cross-reactivity or interference between Biglycan (BGN) and analogues was<br>observed.  |
| Sample Type:                       | <ul> <li>biological fluids. This assay has high sensitivity and excellent specificity for detection of</li> <li>Biglycan (BGN)</li> <li>No significant cross-reactivity or interference between Biglycan (BGN) and analogues was observed.</li> <li>Plasma, Serum</li> </ul>                                      |
| Sample Type:<br>Analytical Method: | <ul> <li>biological fluids. This assay has high sensitivity and excellent specificity for detection of</li> <li>Biglycan (BGN)</li> <li>No significant cross-reactivity or interference between Biglycan (BGN) and analogues was observed.</li> <li>Plasma, Serum</li> <li>Quantitative</li> </ul>                |

| Target Details      |   |  |
|---------------------|---|--|
| Target:             | Biglycan (BGN)  |  |
| Abstract:           | BGN Products  |  |
| Pathways:           | Glycosaminoglycan Metabolic Process   |  |
| Application Details |   |  |
| Application Notes:  | <ul> <li>Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled.</li> <li>It is also strongly suggested that the whole assay is performed by the same user throughout.</li> <li>Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.</li> <li>Standard Form: Lyophilized</li> </ul> |  |
| Comment:            | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.   |  |
| Plate:              | Pre-coated  |  |
| Restrictions:       | For Research Use only   |  |
| Handling            |   |  |
| Storage:            | 4 °C/-20 °C   |  |
| Storage Comment:    | Upon receipt, store the kit according to the storage instruction in the kit's manual.   |  |
| Expiry Date:        | 6 months  |  |
