

## Datasheet for ABIN2542456 **CEA ELISA Kit**

Overview

| Quantity:                | 96 tests   |
|--------------------------|--|
| Target:                  | CEA  |
| Reactivity:              | Human  |
| Method Type:             | Sandwich ELISA   |
| Detection Range:         | 19.53 pg/mL - 1250 pg/mL   |
| Minimum Detection Limit: | 19.53 pg/mL  |
| Application:             | ELISA  |
| Product Details          |  |
| Purpose:                 | Human CEA ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates,        |
|                          | cell culture supernates and other biological fluids. This assay has high sensitivity and excellent |
|                          | specificity for detection of Carcinoembryonic Antigen (CEA)  |
|                          | No significant cross-reactivity or interference between Carcinoembryonic Antigen (CEA) and         |
|                          | analogues was observed.  |
| Sample Type:             | Cell Culture Supernatant, Plasma, Serum, Tissue Homogenate   |
| Analytical Method:       | Quantitative   |
| Detection Method:        | Colorimetric   |
| Specificity:             | This assay has high sensitivity and excellent specificity for detection of Carcinoembryonic        |
|                          | Antigen (CEA)  |
| Sensitivity:             | < 7.5 pg/mL  |
|                          |  |

| Target Details      |  |
|---------------------|--|
| Target:             | CEA  |
| Alternative Name:   | Carcinoembryonic Antigen (CEA) (CEA Products)  |
| Application Details |  |
| Application Notes:  | <ul> <li>Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less</li> <li>than 5 % within the expiration date under appropriate storage conditions. To minimize</li> <li>performance fluctuations, operation procedures and lab conditions should be strictly controlled.</li> <li>It is also strongly suggested that the whole assay is performed by the same user throughout.</li> <li>Recommended dilutions: Optimal dilutions/concentrations should be determined by the end</li> <li>user.</li> <li>Standard Form: Lyophilized</li> </ul> |
| Comment:            | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.  |
| Plate:              | Pre-coated   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Storage:            | 4 °C/-20 °C  |
| Storage Comment:    | Upon receipt, store the kit according to the storage instruction in the kit's manual.  |
| Expiry Date:        | 6 months   |
