CRBN ELISA Kit

Overview

Quantity:	96 tests
Target:	CRBN
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Cereblon ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell
	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was observed.
Sample Type:	detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was
Sample Type: Analytical Method:	detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was observed.
	detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was observed. Cell Lysate, Tissue Homogenate
Analytical Method:	detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was observed. Cell Lysate, Tissue Homogenate Quantitative
Analytical Method: Detection Method:	detection of Cereblon (CRBN) No significant cross-reactivity or interference between Cereblon (CRBN) and analogues was observed. Cell Lysate, Tissue Homogenate Quantitative Colorimetric

Target Details

Target:	CRBN
Abstract:	CRBN Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
