Quantity:	96 tests
Target:	Chordin (CHRD)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat Chordin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Chordin (CHRD) No significant cross-reactivity or interference between Chordin (CHRD) and analogues was observed.
Purpose: Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Chordin (CHRD) No significant cross-reactivity or interference between Chordin (CHRD) and analogues was
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Chordin (CHRD) No significant cross-reactivity or interference between Chordin (CHRD) and analogues was observed.
Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Chordin (CHRD) No significant cross-reactivity or interference between Chordin (CHRD) and analogues was observed. Plasma, Serum, Tissue Homogenate
Sample Type: Analytical Method:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Chordin (CHRD) No significant cross-reactivity or interference between Chordin (CHRD) and analogues was observed. Plasma, Serum, Tissue Homogenate Quantitative

Target Details

Target:	Chordin (CHRD)	
Abstract:	CHRD Products	
Application Details		
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less	
	than 5 % within the expiration date under appropriate storage conditions. To minimize	
	performance fluctuations, operation procedures and lab conditions should be strictly controlled.	
	It is also strongly suggested that the whole assay is performed by the same user throughout.	
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end	
	user.	
	Standard Form: Lyophilized	
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%	
	within the expiration date under appropriate storage conditions. To minimize performance	
	fluctuations, operation procedures and lab conditions should be strictly controlled. It is also	
	strongly suggested that the whole assay is performed by the same user throughout.	
Plate:	Pre-coated	
Restrictions:	For Research Use only	
Handling		
Storage:	4 °C/-20 °C	
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.	
Expiry Date:	6 months
