

## Datasheet for ABIN2543173

## **COL4A1 ELISA Kit**

## Overview

Sensitivity:

Quantity:	96 tests
Target:	COL4A1
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Marrian COL 441 ELICA Vitia a constituiala ELICA Litt for una cuitla Comuna relacada ticarra
i dipose.	Mouse COL4A1 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue

i dipose.	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of COL4A1 (COL4A1)
Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of COL4A1 (COL4A1)  No significant cross-reactivity or interference between COL4A1 (COL4A1) and analogues was
	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of COL4A1 (COL4A1)  No significant cross-reactivity or interference between COL4A1 (COL4A1) and analogues was observed.
Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of COL4A1 (COL4A1)  No significant cross-reactivity or interference between COL4A1 (COL4A1) and analogues was observed.  Plasma, Serum, Tissue Homogenate

< 0.058 ng/mL

## **Target Details**

ranget Betane	
Target:	COL4A1
Alternative Name:	Collagen Type IV alpha 1 (COL4a1) (COL4A1 Products)
Pathways:	Skeletal Muscle Fiber Development, Growth Factor Binding
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
