

Datasheet for ABIN2543336 Concanavalin A ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	Concanavalin A (ConA)
Reactivity:	Various Species
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA

Product Details

Purpose:	Concanavalin A ELISA Kit is a sandwich ELISA kit for use with Biological fluids. This assay has high sensitivity and excellent specificity for detection of Concanavalin A (ConA) No significant cross-reactivity or interference between Concanavalin A (ConA) and analogues was observed.
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Concanavalin A (ConA)
Sensitivity:	< 0.054 ng/mL

Target Details

Target:	Concanavalin A (ConA)
Abstract:	ConA Products

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
Standard Form: Lyophilized

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
