## **Coronin 1a ELISA Kit**

()	ve	r\/i	۱۸/
$\cup$	V C	1 / 1	 v v

Quantity:	96 tests
Target:	Coronin 1a (CORO1A)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Coronin 1A ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell
Purpose:	Human Coronin 1A ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for
Purpose:	
Purpose:	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for
Purpose:	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)
Purpose:  Sample Type:	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues
·	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.
Sample Type:	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.  Cell Lysate, Tissue Homogenate
Sample Type:  Analytical Method:	lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.  Cell Lysate, Tissue Homogenate  Quantitative

## Target Details

9		
Target:	Coronin 1a (CORO1A)	
Alternative Name:	Coronin 1A (CORO1A) (CORO1A Products)	
Pathways:	Regulation of Actin Filament Polymerization	
Application Details		
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized	
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.	
Plate:	Pre-coated	
Restrictions:	For Research Use only	
Handling		
Storage:	4 °C/-20 °C	
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.	
Expiry Date:	6 months
