

## Datasheet for ABIN2543371

## **Coronin 1a ELISA Kit**

## Overview

Quantity:	96 tests
Target:	Coronin 1a (CORO1A)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat Coronin 1A ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates
Purpose:	Rat Coronin 1A ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)
Purpose:  Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.
Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.  Cell Lysate, Tissue Homogenate
Sample Type: Analytical Method:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Coronin 1A (CORO1A)  No significant cross-reactivity or interference between Coronin 1A (CORO1A) and analogues was observed.  Cell Lysate, Tissue Homogenate  Quantitative

## **Target Details**

Target:	Coronin 1a (CORO1A)
Alternative Name:	Coronin 1A (CORO1A) (CORO1A Products)
Pathways:	Regulation of Actin Filament Polymerization
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
