

Datasheet for ABIN2543646

CYP2D6 ELISA Kit

Overview

Quantity:	96 tests
Target:	CYP2D6
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat CYP2D6 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other
Purpose:	Rat CYP2D6 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of
Purpose:	
Purpose:	biological fluids. This assay has high sensitivity and excellent specificity for detection of
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of CYP2D6
·	biological fluids. This assay has high sensitivity and excellent specificity for detection of CYP2D6 No significant cross-reactivity or interference between CYP2D6 and analogues was observed.
Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of CYP2D6 No significant cross-reactivity or interference between CYP2D6 and analogues was observed. Tissue Homogenate
Sample Type: Analytical Method:	biological fluids. This assay has high sensitivity and excellent specificity for detection of CYP2D6 No significant cross-reactivity or interference between CYP2D6 and analogues was observed. Tissue Homogenate Quantitative

Target Details

Target:	CYP2D6
Alternative Name:	Cytochrome P450 2D6 (CYP2D6) (CYP2D6 Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
