

Datasheet for ABIN2543704 **LDHD ELISA Kit**

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	LDHD
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.3 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.3 ng/mL
Application:	ELISA

Product Details

Purpose:	Human D-Lactate Dehydrogenase ELISA Kit is an ELISA kit against Human D-Lactate Dehydrogenase.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.06 ng/mL
Characteristics:	Human D-Lactate Dehydrogenase ELISA Kit is an ELISA kit against Human D-Lactate Dehydrogenase.

Target Details

Target:	LDHD
---------	------

Target Details

Alternative Name: D-Lactate Dehydrogenase ([LDHD Products](#))

Pathways: [Ribonucleoside Biosynthetic Process](#)

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Liquid

Standard Concentration: 27 ng/mL

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
