Sandwich ELISA	
15.62 pg/mL - 1000 pg/mL	
15.62 pg/mL	
ELISA	
Human Defensin Beta 131 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and	
other biological fluids. This assay has high sensitivity and excellent specificity for detection of	
Defensin Beta 131 (DEFb131)	
No significant cross-reactivity or interference between Defensin Beta 131 (DEFb131) and	
analogues was observed.	
Plasma, Serum	
Quantitative	
Colorimetric	
This assay has high sensitivity and excellent specificity for detection of Defensin Beta 131	
(DEFb131)	
< 5.6 pg/mL	

Target Details

It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only	Target:	DEFB131	
Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled it is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized Comment: The stability of the kit is determined by the rate of activity loss.
