## Datasheet for ABIN2543773 **TSC22D3 ELISA Kit**

### Overview

Quantity:	96 tests
Target:	TSC22D3
Reactivity:	Human
Detection Range:	30 pg/mL - 1800 pg/mL
Minimum Detection Limit:	30 pg/mL
Application:	ELISA

### Product Details

Purpose:	Human Delta Sleep-Inducing Peptide ELISA Kit is an ELISA kit against Human Delta Sleep-Inducing Peptide.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	6 pg/mL
Characteristics:	Human Delta Sleep-Inducing Peptide ELISA Kit is an ELISA kit against Human Delta Sleep-Inducing Peptide.

### Target Details

Target:	TSC22D3
Alternative Name:	delta Sleep-Inducing Peptide ( <a href="#">TSC22D3 Products</a> )

## Application Details

---

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only

## Handling

---

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
