

## Datasheet for ABIN2544015 **F4/80 ELISA Kit**

[Go to Product page](#)

### Overview

|                          |                         |
|--------------------------|-------------------------|
| Quantity:                | 96 tests                |
| Target:                  | F4/80 (EMR1)            |
| Reactivity:              | Human                   |
| Method Type:             | Sandwich ELISA          |
| Detection Range:         | 62.5 pg/mL - 4000 pg/mL |
| Minimum Detection Limit: | 62.5 pg/mL              |
| Application:             | ELISA                   |

### Product Details

|                    |  |
|--------------------|--|
| Purpose:           | <p>Human EMR1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of EGF Like Module Containing Mucin Like Hormone Receptor 1 (EMR1)</p> <p>No significant cross-reactivity or interference between EGF Like Module Containing Mucin Like Hormone Receptor 1 (EMR1) and analogues was observed.</p> |
| Sample Type:       | Tissue Homogenate  |
| Analytical Method: | Quantitative   |
| Detection Method:  | Colorimetric   |
| Specificity:       | This assay has high sensitivity and excellent specificity for detection of EGF Like Module Containing Mucin Like Hormone Receptor 1 (EMR1)   |
| Sensitivity:       | < 25.4 pg/mL   |

## Target Details

---

Target: F4/80 (EMR1)

Alternative Name: EGF Like Module Containing Mucin Like Hormone Receptor 1 (EMR1) ([EMR1 Products](#))

## Application Details

---

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

## Handling

---

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
