## Overview

|                      |                                    |
|----------------------|------------------------------------|
| Quantity:            | 200 µL                             |
| Target:              | FAP                                |
| Binding Specificity: | AA 396-426                         |
| Reactivity:          | Human                              |
| Host:                | Rabbit                             |
| Clonality:           | Polyclonal                         |
| Conjugate:           | This FAP antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA       |

## Product Details

|               |                                                                                 |
|---------------|---------------------------------------------------------------------------------|
| Immunogen:    | KLH-conjugated synthetic peptide (aa396-426) from internal region of human FAP. |
|               | Type of Immunogen: Synthetic peptide                                            |
| Isotype:      | IgG                                                                             |
| Specificity:  | Human FAP Alpha                                                                 |
| Purification: | Affinity purified                                                               |

## Target Details

|                   |                                            |
|-------------------|--------------------------------------------|
| Target:           | FAP                                        |
| Alternative Name: | FAP alpha ( <a href="#">FAP Products</a> ) |

## Target Details

|             |                                                                               |
|-------------|-------------------------------------------------------------------------------|
| Background: | Name/Gene ID: FAP                                                             |
|             | Subfamily: Serine S9                                                          |
|             | Family: Protease                                                              |
|             | Synonyms: FAP, DPPIV, FAP alpha, Fibroblast activation protein, FAPA, Seprase |
| Gene ID:    | 2191                                                                          |
| Pathways:   | <a href="#">Tube Formation</a>                                                |

## Application Details

|                    |                                              |
|--------------------|----------------------------------------------|
| Application Notes: | Approved: ELISA (1:1000), WB (1:100 - 1:500) |
| Comment:           | Target Species of Antibody: Human            |
| Restrictions:      | For Research Use only                        |

## Handling

|                    |                                                                                                                                |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                         |
| Concentration:     | Lot specific                                                                                                                   |
| Buffer:            | PBS, pH 7.2, 0.09 % sodium azide.                                                                                              |
| Preservative:      | Sodium azide                                                                                                                   |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.         |
| Handling Advice:   | Aliquot to avoid repeated freezing and thawing.                                                                                |
| Storage:           | 4 °C, -20 °C                                                                                                                   |
| Storage Comment:   | May be stored at 4°C for short-term only. Aliquot to avoid freeze-thaw cycles. Store at -20°C. Aliquots are stable for 1 year. |
