

Datasheet for ABIN2648765

IL-32 alpha ELISA Kit

Overview

Overview	
Quantity:	96 tests
Target:	IL-32 alpha (IL32A)
Reactivity:	Human
Application:	ELISA
Product Details	
Purpose:	Human Interleukin 32 Alpha (IL-32α) ELISA Assay Kit (enzyme-linked immunoassay kit) is
	intended for the quantitative determination of human Interleukin 32 Alpha (IL-32 $lpha$)
	concentrations in cell culture supernates, serum, and plasma.
Sample Type:	Serum, Plasma, Cell Culture Cells
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	7 pg/ml
Characteristics:	Human Interleukin 32 Alpha (IL-32α) ELISA Assay Kit is for research use only and not to be used
	in diagnostic procedures.
Target Details	
Target:	IL-32 alpha (IL32A)
Alternative Name:	IL-32a (IL32A Products)

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Sample Volume:	100 μL
Assay Time:	3.5 h
Plate:	Pre-coated
Protocol:	Human Interleukin 32 Alpha (IL-32 α) ELISA Assay Kit employs the quantitative sandwich enzyme immunoassay technique. A monoclonal antibody specific for IL-32 α ? has been precoated onto a microplate. Standards and samples are pipetted into the wells and any IL-32 α present is bound by the immobilized antibody. Following incubation unbound samples are removed during a wash step, and then a detection antibody specific for IL-32 α is added to the wells and binds to the combination of capture antibody- IL-32 α in sample. Following a wash to remove any unbound combination, and enzyme conjugate is added to the wells. Following incubation and wash steps a substrate is added. A colored product is formed in proportion to the amount of IL-32 α present in the sample. The reaction is terminated by addition of acid and absorbance is measured at 450nm. A standard curve is prepared from seven IL-32 α standard
Restrictions:	dilutions and IL-32α sample concentration determined. For Research Use only
restriction.	. 5. 1.5554.51. 555 511.
Handling	
Storage:	4 °C
