Target Details

Target:	Cadherin 5 (CDH5)
Alternative Name:	CD144 (CDH5 Products)
Background:	CD144, also known as vascular endothelial-cadherin (VE-cadherin), is a 120 kD member of the type II Cadherin family. It is an endothelial specific hemophilic adhesion molecule involved in
	endothelial cell survival, migration, contact-dependent growth inhibition, and homophilic
	adhesion. VE-cadherin is essential for maintaining the integrity of the endothelial barrier in vivo.
