Datasheet for ABIN2669186 **ELISA Assay Diluent (5X)**

Overview

Quantity:	100 mL
Application:	Multiplex Assay (MA), ELISA

Product Details

Characteristics: ELISA Assay Diluent is a 5x concentrated phosphate buffered saline solution containing (pre-screened) bovine serum. This buffer is specifically formulated and tested for ELISA applications, such as blocking antibody-coated ELISA plate microwells, diluting ELISA standards and samples, and diluting biotinylated detection antibodies or tertiary reagents (specifically Avidin-HRP or Streptavidin-HRP). The diluent contains a preservative compatible with peroxidase mediated enzyme activity.

Components: ELISA Assay Diluent (5X)

Application Details

Application Notes: Optimal working dilution should be determined by the investigator. Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

Handling

Format:	Liquid
Concentration:	5 X
Storage:	4 °C
Storage Comment:	This solution can be stored unopened between 2°C and 8°C. After opening, it is recommended

Handling

to use within 30 days or to be aliquoted and stored at -20°C (frost-free) or -70°C for long term storage. Warm ELISA reagents to room temperature (18-25°C) before use.
