Fixation Buffer

[Go to Product page](#)

Overview

Quantity:	100 mL
Application:	Multiplex Assay (MA)

Product Details

Characteristics:	Fixation Buffer is useful for intracellular staining procedures, e.g., in preparation of cells for staining intracellular cytokines or other proteins. Fixation Buffer is used to fix cells prior to permeabilization using Permeabilization Wash Buffer (Cat. No. 421002). Fixation Buffer has been formulated with prescreened paraformaldehyde with low background, thus producing the greatest signal to noise ratio.
Components:	Fixation Buffer

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Storage:	4 °C
Storage Comment:	This buffer solution should be stored between 2°C and 8°C.
