Overview			
Quantity:	20 μg		
Target:	MRPL47		
Protein Characteristics:	Transcript Variant 2		
Origin:	Human		
Source:	HEK-293 Cells		
Protein Type:	Recombinant		
Purification tag / Conjugate:	This MRPL47 protein is labelled with Myc-DYKDDDDK Tag.		
Application:	Antibody Production (AbP), Standard (STD)		
Product Details			
Characteristics:	<ul> <li>Recombinant human MRPL47 (transcript variant 2) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>		
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining		
Target Details			
Target:	MRPL47		
Alternative Name:	Mrpl47 (MRPL47 Products)		
Background:	Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein		
	synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a		
	small 28S subunit and a large 39S subunit. They have an estimated 75 % protein to rRNA		
	composition compared to prokaryotic ribosomes, where this ratio is reversed. Another		

#### **Target Details**

difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 39S subunit protein. This gene is immediately adjacent to the gene for BAF complex 53 kDa subunit protein a (BAF53a), in a tail-to-tail orientation. Two transcript variants encoding different protein isoforms have been identified.

Molecular Weight:

16.8 kDa

NCBI Accession:

NP\_817125

#### **Application Details**

Application Notes:

Recombinant human proteins can be used for:

Native antigens for optimized antibody production

Positive controls in ELISA and other antibody assays

Comment:

The tag is located at the C-terminal.

Restrictions:

For Research Use only

#### Handling

 $50 \, \mu g/mL$ 

Buffer:

25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.

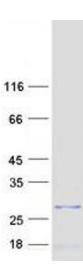

Storage:

-80 °C

Storage Comment:

Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze

immediately. Only 2-3 freeze thaw cycles are recommended.

### **Western Blotting**
