Target Details

Target:	Surfactant Protein A1 (SFTPA1)
Alternative Name:	Sftpa1 (SFTPA1 Products)
Background:	This gene encodes a lung surfactant protein that is a member of a subfamily of C-type lectins called collectins. The encoded protein binds specific carbohydrate moieties found on lipids and on the surface of microorganisms. This protein plays an essential role in surfactant homeostasis and in the defense against respiratory pathogens. Mutations in this gene are
