## Target Details

Target:	COL8a2 (COL8A2)
Alternative Name:	Collagen Type VIII alpha 2 Chain ( <a href="#">COL8A2 Products</a> )
Background:	This gene encodes the alpha 2 chain of type VIII collagen. This protein is a major component of the basement membrane of the corneal endothelium and forms homo- or heterotrimers with alpha 1 (VIII) type collagens. Defects in this gene are associated with Fuchs endothelial corneal dystrophy and posterior polymorphous corneal dystrophy type 2. Alternative splicing results in multiple transcript variants.
