Target: COPSTA Origin: Human Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This COPSTA protein is labelled with Myc-DYKDDDDK Tag. Application: Antibody Production (AbP), Standard (STD) Product Details Characteristics: • Recombinant human COPSTA protein expressed in HEK293 cells. • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: COPSTA Alternative Name: Cops7a (COPSTA Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described. Molecular Weight: 30.1 kDa	Quantity:	20 μg
Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This COPS7A protein is labelled with Myc-DYKDDDDK Tag. Application: Antibody Production (AbP), Standard (STD) Product Details Characteristics: • Recombinant human COPS7A protein expressed in HEK293 cells. • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: COPS7A Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Target:	COPS7A
Protein Type: Recombinant Purification tag / Conjugate: This COPS7A protein is labelled with Myc-DYKDDDDK Tag. Application: Antibody Production (AbP), Standard (STD) Product Details Characteristics: • Recombinant human COPS7A protein expressed in HEK293 cells. • Produced with end-sequenced ORF clone Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: COPS7A Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Origin:	Human

Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining Target Details Target: COPS7A Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Product Details	
Target: COPS7A Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Characteristics:	
Target: COPS7A Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Alternative Name: Cops7a (COPS7A Products) Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multisubunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Target Details	
Background: This gene encodes a component of the COP9 signalosome, an evolutionarily conserved multi- subunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Target:	COPS7A
subunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively spliced transcript variants that encode the same protein have been described.	Alternative Name:	Cops7a (COPS7A Products)
Molecular Weight: 30.1 kDa	Background:	subunit protease that regulates the activity of the ubiquitin conjugation pathway. Alternatively
	Molecular Weight:	30.1 kDa

Target Details

rarget Details		
NCBI Accession:	NP_057403	
Pathways:	Cell Division Cycle	
Application Details		
Application Notes:	Recombinant human proteins can be used for:	
	Native antigens for optimized antibody production	
	Positive controls in ELISA and other antibody assays	
Comment:	The tag is located at the C-terminal.	
Restrictions:	For Research Use only	
Handling		
Concentration:	50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
