Cyclin A1 Protein (CCNA1) (Transcript Variant 1) (Myc-DYKDDDK Tag)

Go to Product pag

	rv/		

Overview		
Quantity:	20 μg	
Target:	Cyclin A1 (CCNA1)	
Protein Characteristics:	Transcript Variant 1	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This Cyclin A1 protein is labelled with Myc-DYKDDDDK Tag.	
Application:	Antibody Production (AbP), Standard (STD)	
Product Details		
Characteristics:	 Recombinant human Cyclin A1 (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone 	
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining	
Target Details		
Target:	Cyclin A1 (CCNA1)	
Alternative Name:	Cyclin a1 (CCNA1 Products)	
Background:	The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance through the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each	

mitotic event. The cyclin encoded by this gene was shown to be expressed in testis and brain,
as well as in several leukemic cell lines, and is thought to primarily function in the control of the
germline meiotic cell cycle. This cyclin binds both CDK2 and CDC2 kinases, which give two
distinct kinase activities, one appearing in S phase, the other in G2, and thus regulate separate
functions in cell cycle. This cyclin was found to bind to important cell cycle regulators, such as
Rb family proteins, transcription factor E2F-1, and the p21 family proteins. Multiple transcript
variants encoding different isoforms have been found for this gene.

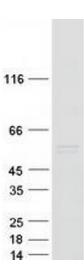

Molecular Weight:	52.2 kDa	
NCBI Accession:	NP_003905	
Pathways:	Apoptosis, Cell Division Cycle, AMPK Signaling, Mitotic G1-G1/S Phases, DNA Replication, M	
	Phase Synthesis of DNA	

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.	
Storage:	-80 °C	
Storage Comment: Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then reimmediately. Only 2-3 freeze thaw cycles are recommended.		

Western Blotting
