Target Details	
Target:	Claudin 22 (CLDN22)
Abstract:	CLDN22 Products
Background:	This gene encodes a member of the claudin family. Claudins are integral membrane proteins
	and components of tight junction strands. Tight junction strands serve as a physical barrier to
	prevent solutes and water from passing freely through the paracellular space between epithelial
	or endothelial cell sheets, and also play critical roles in maintaining cell polarity and signal
	transductions. This gene is intronless and overlaps the 3' UTR of the WWC2 gene (GeneID:
