## Target Details

Target:	CLIC1
Alternative Name:	Clic1 ( <a href="#">CLIC1 Products</a> )
Background:	Chloride channels are a diverse group of proteins that regulate fundamental cellular processes including stabilization of cell membrane potential, transepithelial transport, maintenance of intracellular pH , and regulation of cell volume. Chloride intracellular channel 1 is a member of the p64 family the protein localizes principally to the cell nucleus and exhibits both nuclear and plasma membrane chloride ion channel activity.
