Target Details

Target:	Codanin 1 (CDNA1)
Alternative Name:	Codanin-1 (CDNA1 Products)
Background:	This gene encodes a protein that appears to play a role in nuclear envelope integrity, possibly related to microtubule attachments. Mutations in this gene cause congenital dyserythropoietic anemia type I, a disease resulting in morphological and functional abnormalities of erythropoiesis.
Molecular Weight:	133.9 kDa

Target Details

NCBI Accession: [NP_612486](#)

Application Details

Application Notes: Recombinant human proteins can be used for:
Native antigens for optimized antibody production
Positive controls in ELISA and other antibody assays

Comment: The tag is located at the C-terminal.
