Datasheet for ABIN2713404 CD13 Protein (Myc-DYKDDDDK Tag)

Image

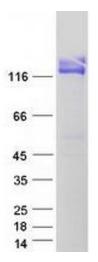

Overview

Quantity:	20 µg
Target:	CD13 (ANPEP)
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CD13 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human CD13 protein expressed in HEK293 cells.Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	CD13 (ANPEP)
Alternative Name:	CD13 (ANPEP Products)
Background:	Aminopeptidase N is located in the small-intestinal and renal microvillar membrane, and also in other plasma membranes. In the small intestine aminopeptidase N plays a role in the final digestion of peptides generated from hydrolysis of proteins by gastric and pancreatic proteases. Its function in proximal tubular epithelial cells and other cell types is less clear. The large extracellular carboxyterminal domain contains a pentapeptide consensus sequence

	characteristic of members of the zinc-binding metalloproteinase superfamily. Sequence
	comparisons with known enzymes of this class showed that CD13 and aminopeptidase N are
	identical. The latter enzyme was thought to be involved in the metabolism of regulatory
	peptides by diverse cell types, including small intestinal and renal tubular epithelial cells,
	macrophages, granulocytes, and synaptic membranes from the CNS. Human aminopeptidase
	N is a receptor for one strain of human coronavirus that is an important cause of upper
	respiratory tract infections. Defects in this gene appear to be a cause of various types of
	leukemia or lymphoma.
Molecular Weight:	106.3 kDa
NCBI Accession:	NP_001141
Pathways:	Peptide Hormone Metabolism, Regulation of Systemic Arterial Blood Pressure by Hormones
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 µg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
