Datasheet for ABIN2713433 PTPRJ Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

1 Image

Overview

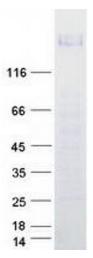

Quantity:	20 µg
Target:	PTPRJ
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PTPRJ protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human CD148 / PTPRJ (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PTPRJ
Alternative Name:	Cd148,ptprj (PTPRJ Products)

Background:	The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP)
	family. PTPs are known to be signaling molecules that regulate a variety of cellular processes,
	including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP

Target Details

	possesses an extracellular region containing five fibronectin type III repeats, a single
	transmembrane region, and a single intracytoplasmic catalytic domain, and thus represents a
	receptor-type PTP. This protein is present in all hematopoietic lineages, and was shown to
	negatively regulate T cell receptor signaling possibly through interfering with the
	phosphorylation of Phospholipase C Gamma 1 and Linker for Activation of T Cells. This protein
	can also dephosphorylate the PDGF beta receptor, and may be involved in UV-induced signal
	transduction. Multiple transcript variants encoding different isoforms have been found for this
	gene.
Molecular Weight:	142 kDa
NCBI Accession:	NP_002834
Pathways:	EGFR Signaling Pathway, Platelet-derived growth Factor Receptor Signaling
Application Details	
Application Notes:	
Application Notes:	Recombinant human proteins can be used for:
Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production
Application Notes:	
Application Notes: Comment:	Native antigens for optimized antibody production
	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Comment:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Comment: Restrictions: Handling	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only
Comment: Restrictions: Handling Concentration:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 μg/mL
Comment: Restrictions: Handling Concentration: Buffer:	 Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal. For Research Use only 50 µg/mL 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
