|---|---|---|----|---|---|---|---|
|   |   |   |    |   |   |   |   |

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 20 μg  |
| Target:                       | SIRPB1   |
| Protein Characteristics:      | Transcript Variant 1   |
| Origin:                       | Human  |
| Source:                       | HEK-293 Cells  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This SIRPB1 protein is labelled with Myc-DYKDDDDK Tag.                                       |
| Application:                  | Antibody Production (AbP), Standard (STD)  |
| Product Details               |  |
| Characteristics:              | Recombinant human CD172b / SIRPB1 (transcript variant 1) protein expressed in HEK293         |
|                               | cells.  • Produced with end-sequenced ORF clone  |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining                                 |
| Target Details                |  |
| Target:                       | SIRPB1   |
| Alternative Name:             | Cd172b,sirpb1 (SIRPB1 Products)  |
| Background:                   | The protein encoded by this gene is a member of the signal-regulatory-protein (SIRP) family, |
|                               | and also belongs to the immunoglobulin superfamily. SIRP family members are receptor-type    |
|                               | transmembrane glycoproteins known to be involved in the negative regulation of receptor      |

### **Target Details**

| tyrosine kinase-coupled signaling processes. This protein was found to interact with         |
|--|
| TYROBP/DAP12, a protein bearing immunoreceptor tyrosine-based activation motifs. This        |
| protein was also reported to participate in the recruitment of tyrosine kinase SYK. Multiple |
| transcript variants encoding different isoforms have been found for this gene.               |

Molecular Weight: 40.8 kDa

NCBI Accession: NP\_006056

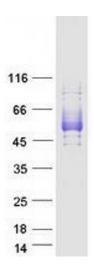

## **Application Details**

| Application Notes: | Recombinant human proteins can be used for:          |
|--------------------|--|
|                    | Native antigens for optimized antibody production    |
|                    | Positive controls in ELISA and other antibody assays |
| Comment:           | The tag is located at the C-terminal.                |
| Restrictions:      | For Research Use only                                |

## Handling

| Concentration:   | 50 μg/mL  |
|------------------|---|
| Buffer:          | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.  |
| Storage:         | -80 °C  |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |
