# CXCR2 Protein (Myc-DYKDDDDK Tag)

Image

$\sim$				
	$ V \cap$	r\/I	19	٨

Overview	
Quantity:	20 μg
Target:	CXCR2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CXCR2 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human CD182 / IL8RB protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	CXCR2
Alternative Name:	Cd182,il8rb (CXCR2 Products)
Background:	The protein encoded by this gene is a member of the G-protein-coupled receptor family. This protein is a receptor for interleukin 8 (IL8). It binds to IL8 with high affinity, and transduces the signal through a G-protein activated second messenger system. This receptor also binds to chemokine (C-X-C motif) ligand 1 (CXCL1/MGSA), a protein with melanoma growth stimulating activity, and has been shown to be a major component required for serum-dependent

	melanoma cell growth. This receptor mediates neutrophil migration to sites of inflammation.
	The angiogenic effects of IL8 in intestinal microvascular endothelial cells are found to be
	mediated by this receptor. Knockout studies in mice suggested that this receptor controls the
	positioning of oligodendrocyte precursors in developing spinal cord by arresting their migration.
	This gene, IL8RA, a gene encoding another high affinity IL8 receptor, as well as IL8RBP, a
	pseudogene of IL8RB, form a gene cluster in a region mapped to chromosome 2q33-q36.
	Alternatively spliced variants, encoding the same protein, have been identified.
Molecular Weight:	40.6 kDa
NCBI Accession:	NP_001548

## **Application Details**

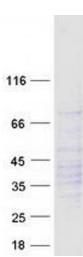

Pathways:

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

cAMP Metabolic Process

### Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

### **Western Blotting**

Image 1. Validation with Western Blot
