Datasheet for ABIN2713946 PRKG1 Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Overview

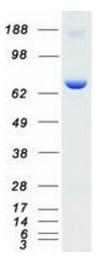

Image

Quantity:	20 µg
Target:	PRKG1
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PRKG1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human CGK1 (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	PRKG1
Alternative Name:	Cgk1 (PRKG1 Products)
Background:	Mammals have three different isoforms of cyclic GMP-dependent protein kinase (Ialpha, Ibeta, and II). These PRKG isoforms act as key mediators of the nitric oxide/cGMP signaling pathway and are important components of many signal transduction processes in diverse cell types.

This PRKG1 gene on human chromosome 10 encodes the soluble lalpha and lbeta isoforms of

	PRKG by alternative transcript splicing. A separate gene on human chromosome 4, PRKG2,
	encodes the membrane-bound PRKG isoform II. The PRKG1 proteins play a central role in
	regulating cardiovascular and neuronal functions in addition to relaxing smooth muscle tone,
	preventing platelet aggregation, and modulating cell growth. This gene is most strongly
	expressed in all types of smooth muscle, platelets, cerebellar Purkinje cells, hippocampal
	neurons, and the lateral amygdala. Isoforms lalpha and Ibeta have identical cGMP-binding and
	catalytic domains but differ in their leucine/isoleucine zipper and autoinhibitory sequences and
	therefore differ in their dimerization substrates and kinase enzyme activity.
Molecular Weight:	77.6 kDa
NCBI Accession:	NP_006249
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
