Datasheet for ABIN2714371
BAF53A Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)
1 Image

Go to Product page

## Overview

| Quantity: | $20 \mu \mathrm{~g}$ |
| :--- | :--- |
| Target: | BAF53A |
| Protein Characteristics: | Transcript Variant 1 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | This BAF53A protein is labelled with Myc-DYKDDDDK Tag. |
| Purification tag / Conjugate: | Antibody Production (AbP), Standard (STD) |
| Application: |  |

Product Details

Characteristics:

- Recombinant human ACTL6A / BAF53 (transcript variant 1) protein expressed in HEK293 cells.
- Produced with end-sequenced ORF clone

Purity: $\quad>80 \%$ as determined by SDS-PAGE and Coomassie blue staining

Target Details

| Target: | BAF53A |
| :--- | :--- |
| Alternative Name: | Actl6a,baf53 (BAF53A Products) |
| Background: | This gene encodes a family member of actin-related proteins (ARPs), which share significant |
| amino acid sequence identity to conventional actins. Both actins and ARPs have an actin fold, |  |
| which is an ATP-binding cleft, as a common feature. The ARPs are involved in diverse cellular |  |

| processes, including vesicular transport, spindle orientation, nuclear migration and chromatin |
| :--- | :--- |
| remodeling. This gene encodes a 53 kDa subunit protein of the BAF (BRG1/brm-associated |
| factor) complex in mammals, which is functionally related to SWI/SNF complex in S. cerevisiae |
| and Drosophila the latter is thought to facilitate transcriptional activation of specific genes by |
| antagonizing chromatin-mediated transcriptional repression. Together with beta-actin, it is |
| required for maximal ATPase activity of BRG1, and for the association of the BAF complex with |
| chromatin/matrix. Three transcript variants that encode two different protein isoforms have |
| been described. |

Pathways:
Chromatin Binding, Photoperiodism

## Application Details

| Application Notes: | Recombinant human proteins can be used for: <br> Native antigens for optimized antibody production <br> Positive controls in ELISA and other antibody assays |
| :--- | :--- |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |
| Handling | $50 \mu \mathrm{~m} / \mathrm{mL}$ |
| Concentration: | 25 mM Tris. $\mathrm{HCl}, \mathrm{pH} 7.3,100 \mathrm{mM}$ glycine, $10 \%$ glycerol. |
| Buffer: | $-80^{\circ} \mathrm{C}$ |
| Storage: | Store at $-80^{\circ} \mathrm{C}$. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze <br> immediately. Only $2-3$ freeze thaw cycles are recommended. |
| Storage Comment: |  |
