## Datasheet for ABIN2714405 AK4 Protein (Transcript Variant 5) (Myc-DYKDDDDK Tag)

Overview

Image

Overview	
Quantity:	20 µg
Target:	AK4
Protein Characteristics:	Transcript Variant 5
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This AK4 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human Adenylate kinase 4 / AK4 (transcript variant 5) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	AK4
Abstract:	AK4 Products

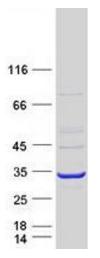

Background:	This gene encodes a member of the adenylate kinase family of enzymes. The encoded protein
	is localized to the mitochondrial matrix. Adenylate kinases regulate the adenine and guanine
	nucleotide compositions within a cell by catalyzing the reversible transfer of phosphate group

## Target Details

	among these nucleotides. Five isozymes of adenylate kinase have been identified in
	vertebrates. Expression of these isozymes is tissue-specific and developmentally regulated. A
	pseudogene for this gene has been located on chromosome 17. Three transcript variants
	encoding the same protein have been identified for this gene. Sequence alignment suggests
	that the gene defined by NM_013410, NM_203464, and NM_001005353 is located on
	chromosome 1.
Molecular Weight:	25.1 kDa
NCBI Accession:	NP_001005353
Pathways:	Nucleotide Phosphorylation, Ribonucleoside Biosynthetic Process
Application Details	
- *	
Application Notes:	Recombinant human proteins can be used for:
	Recombinant human proteins can be used for: Native antigens for optimized antibody production
	Native antigens for optimized antibody production
Application Notes:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Application Notes: Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Application Notes: Comment: Restrictions: Handling	Native antigens for optimized antibody production         Positive controls in ELISA and other antibody assays         The tag is located at the C-terminal.         For Research Use only
Application Notes: Comment: Restrictions:	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Application Notes: Comment: Restrictions: Handling	Native antigens for optimized antibody production         Positive controls in ELISA and other antibody assays         The tag is located at the C-terminal.         For Research Use only

Storage Comment:Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freezeimmediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
