Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	АНСҮ
Alternative Name:	Adohcyase (Ahcy) (AHCY Products)
Background:	S-adenosylhomocysteine hydrolase belongs to the adenosylhomocysteinase family. It catalyzes the reversible hydrolysis of S-adenosylhomocysteine (AdoHcy) to adenosine (Ado) and L-homocysteine (Hcy). Thus, it regulates the intracellular S-adenosylhomocysteine (SAH) concentration thought to be important for transmethylation reactions. Deficiency in this protein is one of the different causes of hypermethioninemia. Alternatively spliced transcript variants
