AKTIP Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Image

Overview	
Quantity:	

Quantity:	20 μg
Target:	AKTIP
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This AKTIP protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human AKTIP / FTS (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Characteristics: Purity:	
	Produced with end-sequenced ORF clone
Purity:	Produced with end-sequenced ORF clone
Purity: Target Details	 Produced with end-sequenced ORF clone > 80 % as determined by SDS-PAGE and Coomassie blue staining

programmed cell death. The protein encoded by this gene is similar to the ubiquitin ligase

Target Details

domain of other ubiquitin-conjugating enzymes but lacks the conserved cysteine residue that enables those enzymes to conjugate ubiquitin to the target protein. This protein interacts directly with serine/threonine kinase protein kinase B (PKB)/Akt and modulates PKB activity by enhancing the phosphorylation of PKB's regulatory sites. Alternative splicing results in two transcript variants encoding the same protein.

Molecular Weight: 32.9 kDa

NCBI Accession: NP_071921

Application Details

Application Notes: Recombinant human proteins can be used for:

Native antigens for optimized antibody production

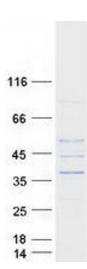

Positive controls in ELISA and other antibody assays

Comment: The tag is located at the C-terminal.

Restrictions: For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
