| Target:           | AMD1   |
| Alternative Name: | Amd1 ( <a href="#">AMD1 Products</a> )   |
| Background:       | This gene encodes an important intermediate enzyme in polyamine biosynthesis. The polyamines spermine, spermidine, and putrescine are low-molecular-weight aliphatic amines essential for cellular proliferation and tumor promotion. Multiple alternatively spliced transcript variants have been identified. Pseudogenes of this gene are found on chromosomes 5, 6, 10, X |
