Target Details	
Target:	Amphiphysin (AMPH)
Alternative Name:	Amphiphysin (AMPH Products)
Background:	This gene encodes a protein associated with the cytoplasmic surface of synaptic vesicles. A
	subset of patients with stiff-man syndrome who were also affected by breast cancer are
	positive for autoantibodies against this protein. Alternate splicing of this gene results in two
	transcript variants encoding different isoforms. Additional splice variants have been described,
