## Target Details

Target:	ARHGEF1
Alternative Name:	Arhgef1 ( <a href="#">ARHGEF1 Products</a> )
Background:	Rho GTPases play a fundamental role in numerous cellular processes that are initiated by extracellular stimuli that work through G protein coupled receptors. The encoded protein may form complex with G proteins and stimulate Rho-dependent signals. Multiple alternatively spliced transcript variants have been found for this gene, but the full-length nature of some
