Target Details

Target:	ARMC10
Alternative Name:	Armc10,svh (ARMC10 Products)
Background:	<p>This gene encodes a protein that contains an armadillo repeat and transmembrane domain.</p> <p>The encoded protein decreases the transcriptional activity of the tumor suppressor protein p53 through direct interaction with the DNA-binding domain of p53, and may play a role in cell growth and survival. Upregulation of this gene may play a role in hepatocellular carcinoma.</p> <p>Alternatively spliced transcript variants encoding multiple isoforms have been observed for this</p>

Target Details
