Target Details

Target:	Arylsulfatase B (ARSB)
Alternative Name:	Arylsulfatase B (ARSB Products)
Background:	Arylsulfatase B encoded by this gene belongs to the sulfatase family. The arylsulfatase B homodimer hydrolyzes sulfate groups of N-Acetyl-D-galactosamine, chondroitin sulfate, and dermatan sulfate. The protein is targeted to the lysosome. Mucopolysaccharidosis type VI is an autosomal recessive lysosomal storage disorder resulting from a deficiency of arylsulfatase B.

Target Details

	Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
