Target Details

Target:	ASB7
Alternative Name:	Asb7 (ASB7 Products)
Background:	The protein encoded by this gene belongs to a family of ankyrin repeat proteins that, along with four other protein families, contains a C-terminal SOCS box motif. Growing evidence suggests
	that the SOCS box acts as a bridge between specific substrate-binding domains and the more generic proteins that comprise a large family of E3 ubiquitin protein ligases. In this way, SOCS

	box containing proteins may regulate protein turnover by targeting proteins for polyubiquination

Molecular Weight: 30.5 kDa
